BioBlanket®

Energy Reflection Therapy

The multilayered holistic energy bio-feedback therapeutic blanket uses Two distinctly different sides = (Yin + Yang) for **4 Different Purposes**

- 1 to help Protect the body by deflecting away external energy influences
- 2 to help Balance the body's multiple energies by establishing a Cocoon
- 3 to help Reflect back to the body its own energy output = BioFeedback
- 4 to help Raise Core Body Temperature and to Synergise with InfraBed®

By using the InfraBed with BioBlanket we multiply and improve energetic transfer from just Conduction and Radiation, by Convection and Reflection.

Feels? - The first thing one usually feels subjectively when being wrapped in the BioBlanket is complete and pleasant protection. External influences are reduced or blocked and/or reflected away. Then one may become aware of subtle shifts as the BioBlanket reflects back the body's own infrared and other frequencies.

YANG Side down - One may feel quickly an emanating feeling of superficial Warmth, that may be followed by periods of warmth focused in parts of the body, that usually passes within minutes (Yang Side). When working with the InfraBeds, when they are turned ON and UP (20C to 70 C) in terms of temperature then the thermal therapy is higher, more obvious and pervasive.

YIN Side down - One may feel quickly a sense of emanating Cool from the BioBlanket, and if the body has been warm, or the weather is hot, this can be a cooling experience, particularly if your InfraBed is turned down or Off. One also can experience a sense of inner peace and quiet that leads towards a state of repose something like a meditation. (Yin Side)

2 Sizes ~ King Single 120 x 200cm \$330 incl GST
King Double 240 x 200cm \$660 incl GST

BioBlanket® is NOT an ARTG Registered therapeutic medical device, so any use with any medical condition should have your doctor's approval.

HOW? - The BioBlanket works essentially by deflecting away external energies that may be influencing the body, and also by reflecting back to itself the body's various energies and also the InfraBed's subtle, infrared and thermal (20C to 70C) energies.

Layers inside the BioBlanket are designed to prevent the body's various energetic emissions from dissipating outwards. These same layers reflect the emissions back onto the body.

You can lie or sit, meditate, reflect, introspect, think, plan or sleep, or even work with your BioBlanket around, under, or over you. There's a layer that is infused with Negative Ions on the Yang side. Also, you can have an InfraBed under you, and it can be on, or off.

BioBlanket helps InfraBed build Core Temperature and Circulation
