

INFRABED®

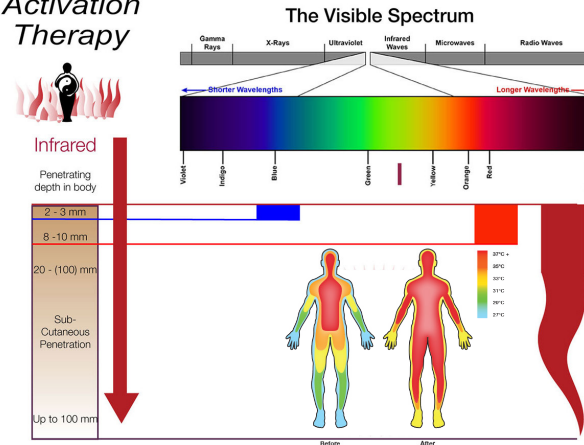

Radiant Thermal Therapy

The new range of InfraBeds are radiant energy thermal therapy underlays or mats that combine two great components working in synergy: Far - Infra - Red - Energy & Amethyst Crystal Energy

Delivering core activation thermal therapy that deeply penetrates to support restoring and raising your core body temperature, metabolism and blood circulation, for better health and healing.

Activation Therapy

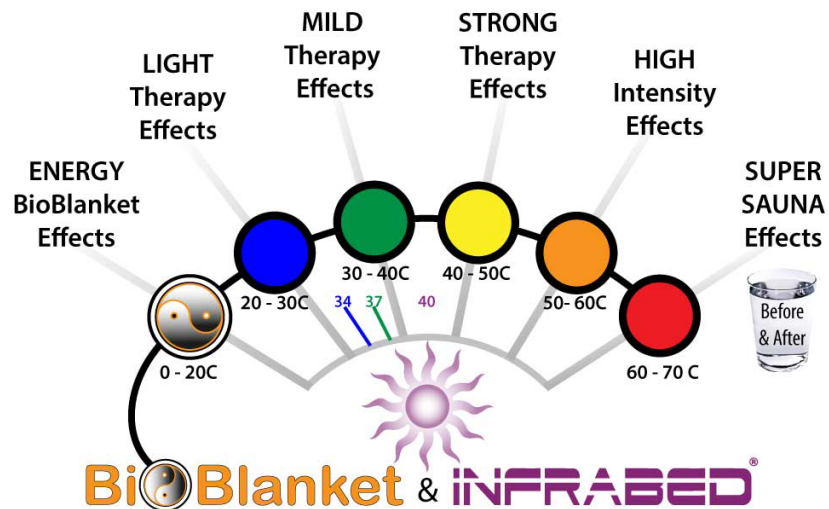

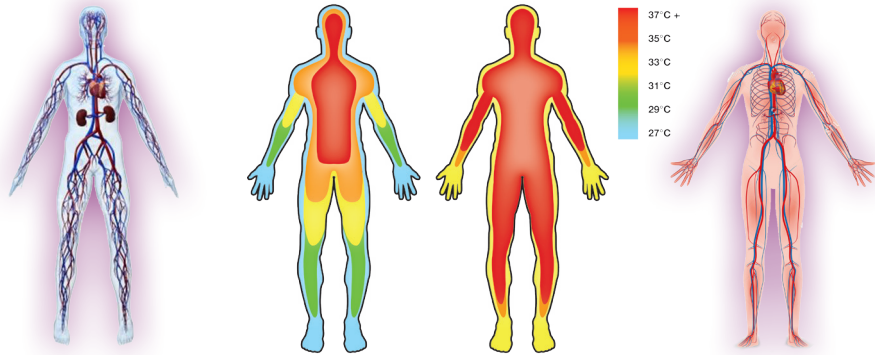

Far-Infra-Red-Energy (or FIRE) Light generation is Nature's own healing heat. FIRE's radiant heat can penetrate from 3 to 10 cms into the body, creating deep nerve, organ, joint, muscle and tissue warmth, reducing stress, relieving pain, by increasing circulation and metabolism, facilitating normal core body temperature.

Amethyst Crystals Amethyst has an ancient reputation as the healing crystal. Amethyst is now proven to be a good conductor and when heated delivers more of the highly absorbable, nourishing, longer wave, Far-Infra-Red-Energy (FIRE). Far Infrared thermal energy is widely used for its anti-inflammatory effects on the body.

InfraBed® comes with a **precise controller for heat ranges (20C - 70C)** with a timer allowing you to find and set your preferred intensity and length of sessions. Long-low temp sessions suit general health, short-hi temps, suit therapeutic uses.

InfraBed includes: **high-quality leather-like fabric surface** that is soft to touch, yet very durable, plus 1 quilted cotton cover, 1 fitted cotton sheet and 1 carry-bag.

INFRABED®

Radiant Thermal Therapy

InfraBed®

EMF 2-way protection

NEW

Rest and recover in your radiant thermal therapy crystal InfraBed synergising **Amethyst Crystal Energy** and **Far-Infra-Red-Energy**

InfraBed's core activation therapy is based on modern and traditional thermal therapy combined with Amethyst Crystals, Far Infra Red Energy and Negative Ions in a multi-layered underlay that deeply penetrates, to restore core body temperature and circulation for better health & healing.
